The Arabic Logic Commission of the DLMPST has one planned activity for the year 2020. This is a meeting of the President and the Secretary together with Saloua Chatti and possibly other interested people, to review the organisation, finances and website of the Commission and to plan future activities. (Following precedent, these future activities should include a symposium at the Congress of History of Science and Technology in Prague 2021, where there will certainly be other symposia on aspects of Arabic science.) This meeting may also be part of an academic meeting where the participants give talks on topics in Arabic Logic. Details (including date and place) are still under discussion.

We have retained the grant of \$1000 received from the DLMPST last year and will use it towards travel expenses for this meeting. So we are not asking for a further grant for 2020.
